EDUCATION

GEORGIA INSTITUTE OF TECHNOLOGY

Master of Science in Computer Science

Expected Graduation: August 2026

- Part-time studies

- Selected Coursework: Artificial Intelligence for Robotics, Machine Learning for Trading, Deep Learning, Machine Learning, Agentic AI Essentials Seminar

SUNY STONY BROOK UNIVERSITY

Aug 2019 - May 2023

Bachelor of Science in Computer Science

- Awards and Honors: Dean's List (2019-2023), One of four students recognized in the College of Engineering and Applied Science Dean's State of the College Address (2022), CEAS Most Improved Organization for Stony Brook Computing Society (2022)
- Selected Coursework: Data Structures and Algorithms, Artificial Intelligence, Analysis of Algorithms, Computer Networks, Probability and Statistics, Natural Language Processing, Machine Learning
- Graduate Coursework: Big Data Analytics, Virtual Reality

SPECIALIZED SKILLS

Computers: Eclipse, IntelliJ, PyCharm, VSCode, Android Studio, Anaconda, Unity, Google Colab, Jupyter Notebook

Technical Languages: Java, Python, Kotlin, HTML, CSS, JavaScript, MIPS, Git, OCaml, R, C, C#, SQL

Frameworks: Bootstrap, React.js, Node.js, Express.js, Jetpack Compose, Jetpack Media3, PyTorch, NumPy, PySpark, Hadoop

Databases: MongoDB, Firebase, SQL

AI Frameworks: Gemini Enterprise

Version Control: GitHub

Languages: Hindi (Fluent); Gujarati (Fluent)

WORK EXPERIENCE

Solutions Analyst – Software Developer, Deloitte, Pennsylvania

September 2024 – Present

- Modernized the Commonwealth of Pennsylvania's (CoPA) [COMPASS](#) application, a benefits portal used by over 8 million citizens, by converting legacy .NET web pages to Angular for improved performance and maintainability
- Authored high-coverage C# backend unit tests and validated 150+ production bugs through reproduction and documentation, ensuring clean resolutions and generating significant cost savings (~\$15K per resolved issue) for Deloitte.
- Designed an LLM-powered Contracts AI application for internal Deloitte usage to automate contract generation between Deloitte and external entities using reference contracts as input
- Spearheading the technical development of *Swarm*, a novel multi-agent solution for shared knowledge transfer between agents at decreased computation and turnaround as part of Deloitte's AI Force R&D team.
- Acting as the GenAI lead for *IntelliScout*, Deloitte's AI-driven talent-matching platform. Built Llama 4-based automation scripts for resume ingestion, semantic parsing, and summary generation, producing candidate-specific enhancement suggestions mapped to role requirements.

Software Engineering Intern, Google, Mountain View, CA

May 2022 - Aug 2022

- Migrated the Universal Android Media Player (UAMP), a media app with over 12.6k stars and 3.6k forks, to Media3 and added spatial audio features ahead of the Android 13 release making it an app showcasing modern app development (MAD) principles
- Converted UAMP to Compose, a modern UI toolkit for android development, to serve as the go-to media use case for developers transitioning media apps to Compose
- Published a technical blog post on Medium.com showcasing what I had learnt from my experience in migrating UAMP and showcasing my findings, such as limitations of Jetpack Compose, the inner workings of Jetpack libraries and Spatial Audio, and a step-by-step guide in recreating such a media app

RESEARCH EXPERIENCE

AI Researcher, Brookhaven National Laboratory, Upton, NY

Aug 2023 – Apr 2024

- Conducted research at the Center of Functional Nanomaterials (CFN) for the use of machine learning in the advanced understanding of nanoparticles (**January 2024 - April 2024**)

- Mentored by Dr. Yugang Zhang

- Conducted research in [explainable artificial intelligence \(XAI\)](#) to explain Transformers for the task of generating scientific images by developing XAI methods that are model-agnostic (**August 2023 – December 2023**)

- Mentored by Dr. Wei (Celia) Xu

Independent Researcher, Human Language Analysis Beings (HLAB) , Stony Brook, NY	Jun 2023 – Feb 2024
<ul style="list-style-type: none"> Conducted research with Prof. Andrew H. Schwartz and Prof. Ryan Boyd on the “L-Factor” project which aims to use language analysis to redefine dimensions to represent human personality to a single factor; previously described by OCEAN and 16 factors of personality (16PF) Used the Differential Language Analysis Toolkit (DLATK) to conduct factor analysis of large datasets to showcase the emergence of a single factor in describing personality through human language 	
Undergraduate Research Assistant, Department of Computer Science , Stony Brook, NY	Aug 2022 - Feb 2023
<ul style="list-style-type: none"> Conducted research on the Language & AI Research (LAIR) group under Dr. Ritwik Banerjee on an Information Distortion Project Created a baseline experiment using BERT to detect distortions (exaggeration/meiosis) of news headlines 	
Team Lead / Full Stack Developer, Tech Business in Development Project , Stony Brook, NY	Jan 2021 - Feb 2023
<ul style="list-style-type: none"> Worked on an interdisciplinary team to create a web application (ClubHub) that improves the student experience by providing a platform for 350+ student organizations and 25000+ students to interact with one another Spearheaded a team of four by drafting specifications and setting clear goals for the project timeline 	
LEADERSHIP EXPERIENCE	
Stony Brook Computing Society	Aug 2020 - May 2023
<i>Vice President (2022-2023), Treasurer (2020-2022)</i>	
<ul style="list-style-type: none"> Spearheaded the conceptualization, strategic planning, and dynamic promotion of captivating campus events and advertising campaigns Networked with external companies and organizations within the College of Engineering and Applied Sciences to hold collaborative events Acted as the point of contact for several initiatives such as sponsorships, fundraisers, and collaborations 	
SUNY Stony Brook University, College of Engineering and Applied Sciences	Aug 2021 - May 2023
<i>Peer Mentor</i>	
<ul style="list-style-type: none"> Served as a support system for three First Year students each year Met with my mentees on a weekly basis to conduct check-ins, answer their questions, and provide a space for them to destress and socialize with one another In total, I mentored six students 	
SBUHacks	Aug 2020 - Sep 2022
<i>Event Coordinator / Partner Relations</i>	
<ul style="list-style-type: none"> Collaborated with student organizations to host workshops during the hackathon Collaborated with the Stony Brook Career Center to raise over \$40k+ in sponsorship between SBUHacks and companies Organized the timings of all events, including committee meetings and submission deadlines 	
SUNY Stony Brook University, Department of Computer Science	Aug 2021 - Dec 2022
<i>Teaching Assistant for Data Structures & Algorithms and Fundamentals of Software Development</i>	
<ul style="list-style-type: none"> Hosted weekly in-person recitations and office hours to assist 110+ students in CSE214 with applying lecture material to exercises and 200+ students in CSE316 with assignments and coursework related to full stack web development Conducted review sessions to help students prepare for exams and assisted in the grading of exams and homework assignments 	
PUBLICATIONS	
<ol style="list-style-type: none"> Xu, W., DeSantis, D. F., Luo, X., Parmar, A., Tan, K., Nadiga, B., Ren, Y., & Yoo, S. (2024). Studying the Impact of Latent Representations in Implicit Neural Networks for Scientific Continuous Field Reconstruction. arXiv preprint arXiv:2404.06418. https://doi.org/10.48550/arXiv.2404.06418 “Mad about Media.” Medium, Android Developers, 26 Aug. 2022, https://medium.com/androiddevelopers/mad-about-media-f536f7d601c
